

Aarau, 04.06.2026 – press release

## findependent hits the half-billion mark in client assets

**The digital wealth manager findependent continues its rapid growth track: assets under management have exceeded the half-billion Swiss francs mark for the first time. This historic milestone comes just a few weeks after the investment app, established since 2021, successfully completed its transformation into a securities firm.**

As the first pure ETF wealth manager in Switzerland, findependent recently obtained its FINMA license as an account-holding securities firm. Since then, the team has been working flat out behind the scenes. The new setup is now well established and over **98%** of existing clients have **opted to move to the securities firm**. They now benefit from an even faster investing experience directly in the app and **very soon** from their own **pillar 3a**.

### Half a billion reached and growth continues to accelerate

Trust in findependent is growing continuously. More and more clients are investing higher and higher amounts. This is clearly reflected in the numbers: "Q2 will be the **22nd consecutive quarter with net inflows**, and **April and May** were actually **record months**," explains Matthias Bryner, founder and CEO of findependent. By reaching the **500 million francs mark in client assets**, findependent underpins its position as one of the fastest-growing digital wealth managers in the country. "Hitting the half-billion mark in entrusted client assets is an amazing success for us," Bryner says happily. "But I'm at least as pleased about how smoothly our clients switched to the securities firm and that findependent is also trusted as a custodian."

### Own 3a foundation is being established

The next big step is just around the corner: the offering will now be expanded to include a **pillar 3a**. "We want to offer the same simple and intuitive investment experience in pillar 3a as you are used to, which is why we decided to set up our own 3a foundation," explains Bryner. As planned, findependent will **launch** this in the **second half of the year**.
